

PRODAC
International
Providing Aquatic Solutions

CATALOGUE 7

QUALITY AND EFFICIENCY CANNOT EXIST WITHOUT EXPERIENCE

What is the most heartfelt to our customers is "the well-being of their fish". For over 40 years PRODAC International company guarantees the well-being and maintains the splendid beauty of our aquarium friends. Even if the fish life style is not changing so fast as the human one, also they are looking for a variety and titbit. That is why PRODAC professional team meticulously searches the best natural ingredients and balanced recipes to create the high quality nutritive food, 100% Made in Italy, for every specific kind of aquarium and pond fish. Thanks to our exclusive addition such as finest garlic, aloe vera pure extract, Omega-3 and Omega-6 complex your underwater guest will receive all health benefits at reasonable price. A desire to be a trustworthy expert for our clients has led us to collaborate with important marine biologists. Together with our international team we study the individual needs of exotic species and define for them healthy, complete and digestible meals.

As every type of fish are living in their particular ecosystem, it is necessary to create environment that suits them best. Our wide range of PRODAC items for aquarium freshwater and marine fish, pond and reptile allows you to discover the best suitable solution for the aquarium-care question - from basic fish care products for the beginners to complex care with professional treatment for the experts.

The PRODAC main edge as reliable quality at affordable price, but also family traditions, industrial rationality and environment sustainability have allowed our company to expand on the market and achieve the international recognition. In our growth, we always have followed enthusiasm and passion of Mr. Zanon Ferruccio, the company's founder who has been a pioneer of aquariums in Italy. Actually, brand PRODAC is selling over five continents, in more than 45 countries.

Complementing our assortment with exclusive water treatment products and technical equipment, we make it more friendly for our customers to start and develop such a pleasant and fascinating hobby as aquarium.

FISH FOOD PACKED IN ENVIRONMENTALLY FRIENDLY JARS.

All fish food produced by PRODAC INTERNATIONAL is packed in jars that are biodegradable including the lid. The jars do not need any special treatment to start the decomposition process, they do not need light, heat, or mechanical action. They completely biodegrade, both aerobically and anaerobically, when they are thrown in any place where other substances are decomposing, such as: refuse, bins, tips, compost or soil.

The jars do not need special storage conditions, nor are they damaged by heat, light, humidity or the stresses imposed by transportation, shipment, warehousing or handling. The material of which they are made is free of heavy metals, ecologically safe and complies with Directive 94/62/EC of the European Parliament and European Council dated 20 December 1994 on packaging and packaging waste.

FISH FOOD

"An act of love towards the fish and the environment"

FILTERING MEDIA

CRYSTALCIL MINI

Sintered glass cylinder media with an excellent porosity for mechanical and biological filtering of fresh and saltwater aquariums.

CRYSTALCIL MINI has a dual function: mechanical filtering as it traps coarse impurities carried by the water (leaves, excess food, excrement), biological filtering thanks to its porous characteristic which offers a large surface area to help and promote bacteria development which then break down the organic substances.

**NEW
PRODUCT**

PACKED IN NET BAG

MECHANICAL AND BIOLOGICAL FILTERING

CODE	WEIGHT	UM	CARTON	
CRYM200	200 gr	PCS	12	8018189100949

• Use: place CRYSTALCIL MINI in the external filter or in the biological filter under the water recycle pump so that the water passes through it completely. Our 200 gr packet is sufficient for 80-120 litre aquariums. Although this product remains effective for a long period of time, it is however recommended to replace approximately every six months.

CRYSTALCIL

Sintered glass cylinder media with an excellent porosity for mechanical and biological filtering of fresh and saltwater aquariums.

CRYSTALCIL has a dual function: mechanical filtering as it traps coarse impurities carried by the water (leaves, excess food, excrement), biological filtering thanks to its porous characteristic which offers a large surface area to help and promote bacteria development which then break down the organic substances.

• **Use:** rinse this product with running water for a few minutes and then place in the external filter or in the biological filter, and if possible between two pieces of synthetic fibre for mechanical filtration (for ex. PRODAC'S FILTERWATTE). Our 300 gr packet is sufficient for 100 - 150 litre aquariums and our 1000 gr packet is sufficient for aquariums with capacities up to 500 - 600 litres. Replace this product every 90 days.
Warning: always remove CLAROCAR from the filtering system when using treatments.

MECHANICAL AND BIOLOGICAL FILTERING

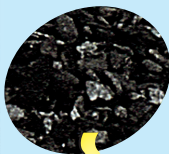

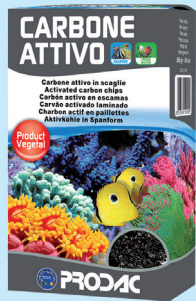

CARBONE ATTIVO

Vegetable based carbon for chemical and biological filtration for both fresh and saltwater aquariums.

• **Use:** fill a fine mesh bag with this product, and rinse with running water for a few minutes and then place in the external filter or in the biological filter, and if possible between two pieces of synthetic fibre for mechanical filtering (PRODAC's FILTERWATTE).

MADE in Italy

MECHANICAL
AND
BIOLOGICAL
FILTERING

CODE	WEIGHT	UM	CARTON	
CATT	250 gr	PCS	12	8018189100055

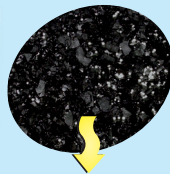

Our 250 gr packet is sufficient for 100 - 150 litre aquariums. Replace this product every 90 days. Warning: always remove CARBONE ATTIVO from the filtering system when using treatments.

AKTIVKOHLE PLUS

Is a mix consisting in high-absorbing resins and coconut carbon, which is physically activated utilizing water vapour, for the chemical and biological filtration of salt and fresh water aquariums. It is an exclusive PRODAC INTERNATIONAL media product with a wide range of functions as it "adsorbs" through the carbon: colouring agents, medicinal and organic pollutants, toxins and through the resins neutralizes: ammonia, nitrates and phosphates.

EXCELLENCE
MADE in Italy

**ADSORBS NITRATE
AND POLLUTING
SUBSTANCES**

CODE	WEIGHT	UM	CARTON	
AK200	200 gr	PCS	12	8018189100307
AK400	400 gr	PCS	12	8018189100222

As AKTIVKOHLE PLUS is pre-washed to avoid altering the pH level and to maintain the resins damp and active, it is a ready to use product. Each gram of active carbon develops 1200 m² of "adsorbing" surface area ensuring efficient and total filtration.

• **Use:** fill a fine mesh bag with the media, place it in the external filter or in the biological filter located under the centrifugal pump so that water passes through it completely. The 400 gr packet is sufficient for 100-150 litre aquariums, the 200 gr packet is sufficient for 40 -100 litre aquariums. Replace the product every 90 days. **Warning:** remove AKTIVKOHLE PLUS from the filtering system each time treatment products are used.

CARBO ZEO

Filtering medium blend made with 50% super-activated carbon (CLAROCAR) and 50% best selected zeolite (ZEOLITE) for fresh and marine water aquarium.

Activated carbon absorbs the polluting pigments produced by the decomposition of many substances in aquarium, such as food waste, dead algae and plants. Zeolite absorbs and neutralizes nitrites, nitrates, silicates and ammonia, keeping the aquarium water crystal clear.

EXCELLENCE
MADE in Italy

PACKED IN NET BAG

CODE	WEIGHT	UM	CARTON	
CARBO	700 gr	PCS	12	8018189100383

On the basis of very positive tests made at their own laboratories, PRODAC guarantee excellent results by using CARBO ZEO as filtering medium.

• **Use:** fill a fine mesh bag with the media, place it in the external filter or in the biological filter located under the centrifugal pump so that water passes through it completely. Packet of 700 gr sufficient for 120 to 150 l aquarium. The product must be replaced every 90 days.

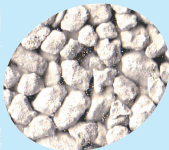

ZEOLITE

Filtering medium for biological and mechanical filtration for fresh and marine water aquarium.

Zeolite material comes from vulcans and its molecular structure is very regular. Its absolutely high porosity absorbs ions and molecules of different composition and size, so that it neutralizes ammonium, silicates, nitrites and nitrates.

EXCELLENCE
MADE in Italy

**PACKED
IN NET BAG**

CODE	WEIGHT	UM	CARTON	
ZE700	700 gr	PCS	12	8018189100369

ZEOLITE from PRODAC has an inside surface of 600 sq m/g, this guarantees the total absorption of polluting organic and inorganic substances.

- **Use:** fill a fine mesh bag with the media, place it in the external filter or in the biological filter located under the centrifugal pump so that water passes through it completely. Packet of 700 gr sufficient for 120 to 150 l aquarium. The product must be replaced every 90 days.

ADSORBS POLLUTING ORGANIC AND SUBSTANCE

AQUATOR

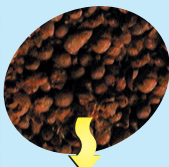

Granular peat with a very high humic acid content (25%) and indispensable for maintaining a balanced pH level in freshwater aquariums.

The humic acid content darkens the water slightly recreating the ideal tropical habitat where most ornamental fish originate from.

Moreover AQUATOR frees numerous mineral substances and trace elements promoting the biological balance in the aquarium.

EXCELLENCE
MADE in Italy

**KEEPS pH
STABLE**

CODE	WEIGHT	UM	CARTON	
ATOR	400 gr	PCS	12	8018189100031

- **Use:** fill a fine mesh bag with AQUATOR and place the bag in the biological filter and if possible between two pieces of synthetic fibre for mechanical filtering (for ex. PRODAC'S FILTERWATTE).

Our 400 gr packet is sufficient for 125 - 200 litre aquariums. Replace this product every 90 days.

**25%
HUMIC ACID**

MUTACAL

Special ion exchange resins which reduce the total water hardness in freshwater aquariums.

The ideal total water hardness for tropical fish must be maintained under 8 °dGH of hardness, whereas total water hardness GH of tap water is on average 11 °dGH degrees of hardness and often higher. MUTACAL resins reduce the hardness quickly.

EXCELLENCE
MADE in Italy

**LOWERS GH
VALUE**

**NET BAG
INCLUDED**

the resins in a funnel or similar container and pour the saltwater solution over the bag. Repeat this operation for about 8-10 minutes. Once these resins have been regenerated, reposition in the aquarium as previously described. MUTACAL resins can be regenerated up to three times.

CODE	SIZE	UM	CARTON	
MCAL	250 ml	PCS	12	8018189100192

- **Use:** the packet contains 250 gr of resins which is sufficient for 130 litres of water. Depending on aquarium capacity, fill a fine mesh bag with the required quantity of MUTACAL resins and place in the filter. After 24 hours test water hardness and if hardness results to be at an acceptable level, remove the bag containing the resins. If total hardness is still too high, replace the bag in the aquarium after having first regenerated the resins.

To regenerate the resins proceed as follows: dissolve 500 gr of salt in two litres of water, place the fine mesh bag containing

NO NITRATES

A filtering media consisting of specific resins which adsorb nitrates found in freshwater aquariums and do not release the adsorbed substances in the water.

It is recommended that nitrates concentration is maintained below 20 mg/l to prevent creating the ideal conditions for algae growth.

EXCELLENCE
MADE in Italy

**NITRATES
ADSORPTION**

**NET BAG
INCLUDED**

CODE	SIZE	UM	CARTON	
NON200	200 ml	PCS	12	8018189100314

- **Use:** fill the fine mesh bag provided with the product, rinse under running water for approximately 3 minutes and position in the biological filter preferably located underneath the recycle pump so that the water passes through it completely or position the bag with the product in the external filter. Dosage: 100 ml is sufficient for 400 litres of water. When to replace this product depends on the quality of nitrates in the water, however it is recommended to replace every six months. There are no adverse effects in the event the recommended dosage is exceeded. The packaging contains 2 bags x 100 ml of product.

NO PHOSPHATES

A filtering media consisting of specific resins which adsorb phosphates and silicates found in fresh and saltwater aquariums and do not release the adsorbed substances in the water.

It is recommended that phosphate concentration in freshwater aquariums does not exceed 0.3 mg/l as this promotes the ideal conditions for algae growth, whereas in saltwater aquariums it is highly recommended that the phosphate concentration does not exceed 0.1 mg/l otherwise this condition affects the natural process of calcium absorption by organisms in the aquarium which require this vital substance such as red coralline algae, hard corals.

NOP200	200 ml	PCS	12	8018189100093
NOP400	400 ml	PCS	12	8018189100321

- Use: fill a fine mesh bag with the product, rinse under running water for approximately 3 minutes and position in the biological filter preferably located underneath the recirculation pump so that the water passes through it completely or position the bag with the product in the external filter.
- NO PHOSPHATES can be also placed in a fluidised bed filter in saltwater aquariums fitted with this system, in this way the product is continuously moved by the constant water flow.

Dosage: 200 ml of product is sufficient for 800 litre freshwater aquariums and 400 litre saltwater aquariums, 100 ml of product is sufficient for 400 litre freshwater aquariums and 225 litre saltwater aquariums. When to replace this filter media depends on the quantity of phosphates and silicates in the water, however it is recommended to replace with new media every four months. There are no adverse effects in the event the recommended dosage is exceeded.

Fine coarse filtering sponge for mechanical and biological filtration in fresh and marine water and ponds

• **Directions of use:** rinse before using. Insert the large coarse sponge in the water inlet of the filter, to hold larger particles. Insert the fine coarse sponge in the intermediate stage of the filter. Both sponges must adhere the filter walls. Water must go through the sponges.

Rinse the sponges every 3 months using only tap water and replace them every 12 months. We advise washing one sponge at a time, waiting 7 days before washing the other one, to avoid destroying the bacterial fauna.

BIOTRIX is the perfect combination of vital elements for the aquarium and the best product to maintain a correct biological balance in the water.

- **Dosage:** approximately every 15 days pour 10 ml of BIOTRIX BLACKWATER for every 40 litres of water directly into the aquarium. Store this product in a cool, dry place and out of reach of children.

MAKE BLACKWATER AS TROPICAL WATER

ALGA CONTROL

Water treatment for freshwater aquariums which controls, prevents and eliminates the growth of algae and infusoria that is harmful to fish, and above all to aquatic plants. Green algae, not only grows on the bottom of the aquarium and on the decorations, but it can also develop on the foliage of aquatic plants impeding their growth.

EXCELLENCE
MADE in Italy

CODE	SIZE	UM	CARTON	
AG100.01	100 ml	PCS	12	8018189800160
AG250.01	250 ml	PCS	12	8018189800177

- **Dosage:** depending on the extent of opaqueness and colour of the water, once a week add 10 ml every 50 litres of water. To prevent the growth of algae and infusoria, as well as using ALGA CONTROL it is recommended to: make sure the aquarium is not in direct sunlight, do not overfeed, control water acidity (pH) and adjust lighting and use appropriate light bulbs for aquariums. Keep out of reach of children.

ANTI-ALGAE FOR FRESH WATER AQUARIUM

SNAIL STOP

SNAIL STOP is a liquid solution for efficiently controlling and eliminating snail and parasite infestation in your aquarium. This product acts on the eggs which are deposited on the bed of the aquarium. Just one single egg, together with the aquatic plants can create a rapid proliferation of an enormous quantity of snails causing harm and damage to both the fish and plants. It is of utmost importance to immediately use SNAIL STOP to avoid serious damage and harm to the living organisms in the aquarium

EXCELLENCE
MADE in Italy

CODE	SIZE	UM	CARTON	
SNAIL30	30 ml	PCS	12	8018189200298

• **Use and dosage:** remove the active carbon and ion exchange resin filter media from the filter, pour SNAIL STOP directly into the aquarium once every three days, always respect the following dosages: 1 ml (1st mark on the dosing tube) for every 20 lt, 2.5 ml (2nd mark on the dosing tube) for every 50 lt, 4 ml (3rd mark on the dosing tube) for every 80 lt, until completely eliminating all the snails. This treatment can be repeated up to five times.

Warning: certain species of fish such as Botia and Discus may show signs of intolerance to this product, therefore when treating the aquarium with SNAIL STOP it is utmost importance to control their behaviour. As it is necessary to change 1/3 of the water in the aquarium after completing treatment, replace filtering media with new active carbon and reposition in the filter (PRODAC's CLAROCAR or highly-recommended AKTIVKOHLE PLUS). Keep the product out of reach of children.

AQUASALZ

Oxygenating salts formulated and produced by PRODAC INTERNATIONAL, which dissolve waste deposited on the bottom of the aquarium causing the waste particles to rise to the surface rendering cleaning easier.

EXCELLENCE
MADE in Italy

CODE	WEIGHT	UM	CARTON	
ASALZ	75 gr	PCS	6	8018189200069

AQUASALZ increases the quantity of oxygen which is often lacking in aquariums, above all during the summer season when temperatures are higher. AQUASALZ also maintains the water crystal clear and ensures the safe growth of fish and plants. This product can also be used in saltwater aquarium WITHOUT INVERTEBRATES as it is ideal for preventing the growth of red algae.

For best and efficient results we recommend that you pour a small quantity of this mixture into a plastic tube and then "blow" the product directly on the algae to eliminate them.

- **Use:** turn off the water pump or filter for 8 minutes and sprinkle AQUASALZ on the surface of the water.
- **Dosage:** a full measure for every 70 litres of water every 15 to 18 days. Keep out of reach of children.

MUTAPHI D pH-/KH-

The ideal pH value in a freshwater aquarium is between 6,5 and 7,0 depending on the species of fish. An increase or a decrease in this value can be very dangerous for the fish and above all when the it exceeds 7,5. MUTAPHI D pH-/KH- is a liquid solution which lowers the pH level to the required value.

EXCELLENCE
MADE in Italy

TEST pH 4,5 - 9,0

Water test for measuring the pH.

CODE	SIZE	UM	CARTON	
TPH	12 ml	PCS	6	8018189400278

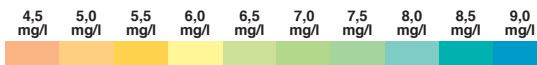

• Instructions:

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add 2 drops of the reagent contained in the bottle and gently swirl to mix.
3. Match the colour of the sample with the colour chart by positioning the test tube next the most similar colour.

For accurate readings compare the colours from above. The ideal pH level for freshwater fish is between 6.8 and 7.0, if lower, it is necessary to increase the pH to a safe level for the fish. To do this utilize a specific product such as PRODAC'S MUTAPHI M pH+. If the pH level is higher, it is necessary to lower it and to do this use a specific product such as PRODAC'S MUTAPHI D pH-. The ideal pH level for saltwater is between 8.1 and 8.4, if lower, it is necessary to increase the pH to a safe level for the fish. To do this utilize a specific product such as PRODAC'S MUTAPHI M pH+. If the pH level is higher, it is necessary to lower it and to do this use a specific product such as PRODAC'S MUTAPHI D pH-.

Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

• COLOUR SCALE

TEST GH

Water test for measuring total hardness GH.

CODE	SIZE	UM	CARTON	
TGH	12 ml	PCS	6	8018189400063

• Instructions:

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add one drop at a time of the reagent contained in the bottle and gently swirl to mix the solution after every drop. COUNT the number of drops until the solution turns green.

3. Once the solution has turned green leave it to stand for 30 seconds. If the colour disappears, add more drops of reagent until the solution remains green.

4. Total water hardness is given in German degrees (°dGH) and corresponds to the number of drops of reagent utilized to obtain the green colour. 1 drop = 1° dGH. Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

TEST KH

Water test for measuring temporary hardness KH.

CODE	SIZE	UM	CARTON	
TKH	12 ml	PCS	6	8018189400070

• **Instructions:**

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add one drop at a time of the reagent contained in the bottle and gently swirl to mix the solution after every drop. COUNT the number of drops until the solution turns from light yellow to a red-purple colour.
3. Once the solution has turned red-purple leave it to stand for 30

seconds. If the colour disappears, add more drops of reagent until the solution remains this red purple colour.

4. Temporary water hardness is given in German degrees (°dKH) and corresponds to the number of drops of reagent utilized to obtain the red purple colour. 1 drop = 1° dKH

Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

TEST NO₂

Water test for measuring nitrites NO₂.

CODE	SIZE	UM	CARTON	
TNO2	12 ml	PCS	6	8018189400049

• **Instructions:**

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add 4 drops of reagent n. 1 and swirl to mix.
3. Add 4 drops of reagent n. 2 and mix by repeatedly turning the test tube upside down, the water changes colour. Development time is approximately 4 minutes.

4. Match the colour of the sample with the colour chart by positioning the test tube next the most similar colour. For accurate readings compare the colours from above.

Warning: in the event the nitrite concentration exceeds 0,5 mg/l it is necessary to regularly change a small quantity of the aquarium water and use a specific product such as PRODAC'S NITRIDAC.

Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

**WE ALSO
RECOMMEND**

• **COLOUR SCALE**

TEST NO₃

Water test for measuring nitrates NO₃.

CODE	SIZE	UM	CARTON	
TNO3	12 ml	PCS	6	8018189400056

• **Instructions:**

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add 4 drops of reagent n. 1 and swirl to mix.
3. Add a small amount of the test reagent n. 3 (powder), just the spatula and swirl to mix.
4. Add 4 drops of reagent n. 2 and mix by repeatedly turning the test tube upside down, the water changes colour.

Development time is approximately 4 minutes.

5. Match the colour of the sample with the colour chart by positioning the test tube next the most similar colour. For accurate readings compare the colours from above.

Warning: if the quantity of nitrates in the water exceeds 25 mg/l, it is of utmost importance to change a small amount of the water and to use a specific product such as PRODAC'S NITRIDAC. Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

• **COLOUR SCALE**

WE ALSO
RECOMMEND

TEST NH₃/NH₄

Water test for measuring ammonia and ammonium NH₃/NH₄

CODE	SIZE	UM	CARTON	
TNH3.1	12 ml	PCS	6	8018189400087

• **Instructions:**

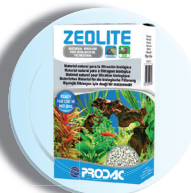

1. Shake the bottled reagents well before use.
2. Rinse the test tube several times with the water to be tested and then fill with water to the 5 ml mark. Dry the outside of the tube.
3. Add 5 drops of reagent 1, cap the test tube and gently shake to mix for 5 seconds.
4. Add 5 drops of reagent 2, cap and shake in the same way.

5. Add 5 drops of reagent 3, cap and shake in the same way. After 5 minutes the test solution turns colour. Match the colour of the solution with the colour chart.

For accurate readings compare the colours from above, under natural daylight and avoid direct sunlight. Determine the level of free toxic ammonia (NH₃) depending on ammonium (NH₄) and pH value, according to the chart.

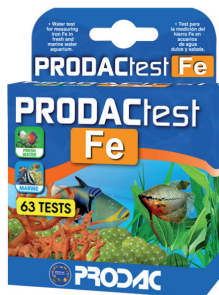

Thoroughly clean and dry the test tube after use, securely seal all reagent bottles and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

• **COLOUR SCALE**

WE ALSO
RECOMMEND

TEST Fe

Water test for measuring iron Fe.

CODE	SIZE	UM	CARTON	
TFE.2	12 ml	PCS	6	8018189400117

• Instructions:

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add 5 drops of reagent and gently swirl to mix, if there is an iron concentration the water changes colour.
Development time is approximately 5 minutes.
3. Match the colour of the sample with the colour chart by positioning the test tube next the most similar colour.

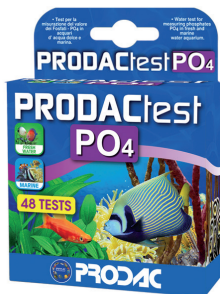

For accurate readings compare the colours from above.

Warning: the iron concentration must not exceed 0,05-0,1 mg/l in freshwater and 0,05 mg/l in saltwater aquariums. Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

• COLOUR SCALE

TEST PO₄

Water test for measuring phosphates PO₄.

CODE	SIZE	UM	CARTON	
TPO4.0	12 ml	PCS	6	8018189400360

• Instructions:

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 10 ml mark.
2. Add 5 drops of reagent n. 1 and swirl to mix.
3. Add a very small amount of the test reagent 2 (powder), just the tip of the spatula and mix by repeatedly turning the test tube upside down for 4-5 times.
4. Read the result the colour at 5th minute.

5. Match the colour of the solution with the colour chart. For accurate readings compare the colours from above, under natural daylight and avoid direct sunlight.

Warning: phosphate concentration must not exceed 0,50 mg/l in freshwater aquariums and 0,10 mg/l in saltwater aquariums. In the event phosphate concentration exceeds these levels, it is necessary to regularly change a small quantity of the aquarium water and use a specific product such as PRODAC'S NITRIDAC. Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.

• COLOUR SCALE

TEST CA

Water test for measuring calcium Ca.

CODE	SIZE	UM	CARTON	
TCA.GB	12 ml	PCS	6	8018189400094

• Instructions:

1. Rinse the water sample test tube several times with the water to be tested and then fill with sample water to the 5 ml mark.
2. Add 8 drops of reagent n. 1 gently swirl to mix.
3. Add a very small amount of test reagent 2, just the tip of the spatula, the solution turns a pink-violet colour.
4. Add one drop at a time of reagent n. 3. and gently swirl to mix the solution after

every drop. COUNT the number of drops until the solution turns from a pink-violet colour to light blue.

5. Once the solution has turned light blue leave it to stand for 30 seconds. If the colour disappears, add more drops of reagent 3 until the solution remains this light blue colour.

6. To calculate the quantity of calcium in mg/l contained in the water multiply the number of drops of reagent n.3 utilized to turn the solution a light blue colour by 20.

Warning: it is of utmost importance that the drops of reagent n.3 are regular in size, if scarce or excessive it is recommended to repeat the test. **Thoroughly clean the test tube after use, securely seal all reagent containers and store in a cool, dry place away from sunlight. Keep the product out of reach of children.**

Refill of reagent No.3 of Prodactest for measuring Calcium Ca.

Additives (per kg). Nutritional additives: 3a672b Vitamin A (retinyl palmitate) 5,000,000 I.U., 3a671 Vitamin D3 200,000 I.U., 3a700 Vitamin E (all rac-alpha-tocopherol acetate) 4,750 mg.
Expiry date and lot number see at bottom of the packaging.

DISCUS ELIXIR

EXCELLENCE
MADE in Italy

Concentrate solution especially formulated for Discus. Increasing vitality, stimulating appetite and reproduction and promoting the fish's natural colour.

CODE	SIZE	UM	CARTON	
EX250.01	250 ml	PCS	12	8018189800245
EX500.01	500 ml	PCS	6	8018189800252

It contains iodine, magnesium and a complete vitamin B complex (B1, B2, B6) ideal for increasing vitality, stimulating appetite and reproduction and promoting the fish's natural colour. As aquarium water poor in iodine provokes thyroid problems and magnesium strengthens and reinforces the bone structure preventing stunted growth, it is therefore essential to maintain these minerals at a constant level in the aquarium.

As DISCUS ELIXIR is a liquid it is easily absorbed and constant use of this product ensures these minerals and other elements vital for Discus and all other tropical fish are maintained in the water.

- **Use:** every four weeks pour 10 ml for every 20 litres of water directly into the aquarium. Store in a cool, dry place and keep out of reach of children.

AROWANA ELIXIR

EXCELLENCE
MADE in Italy

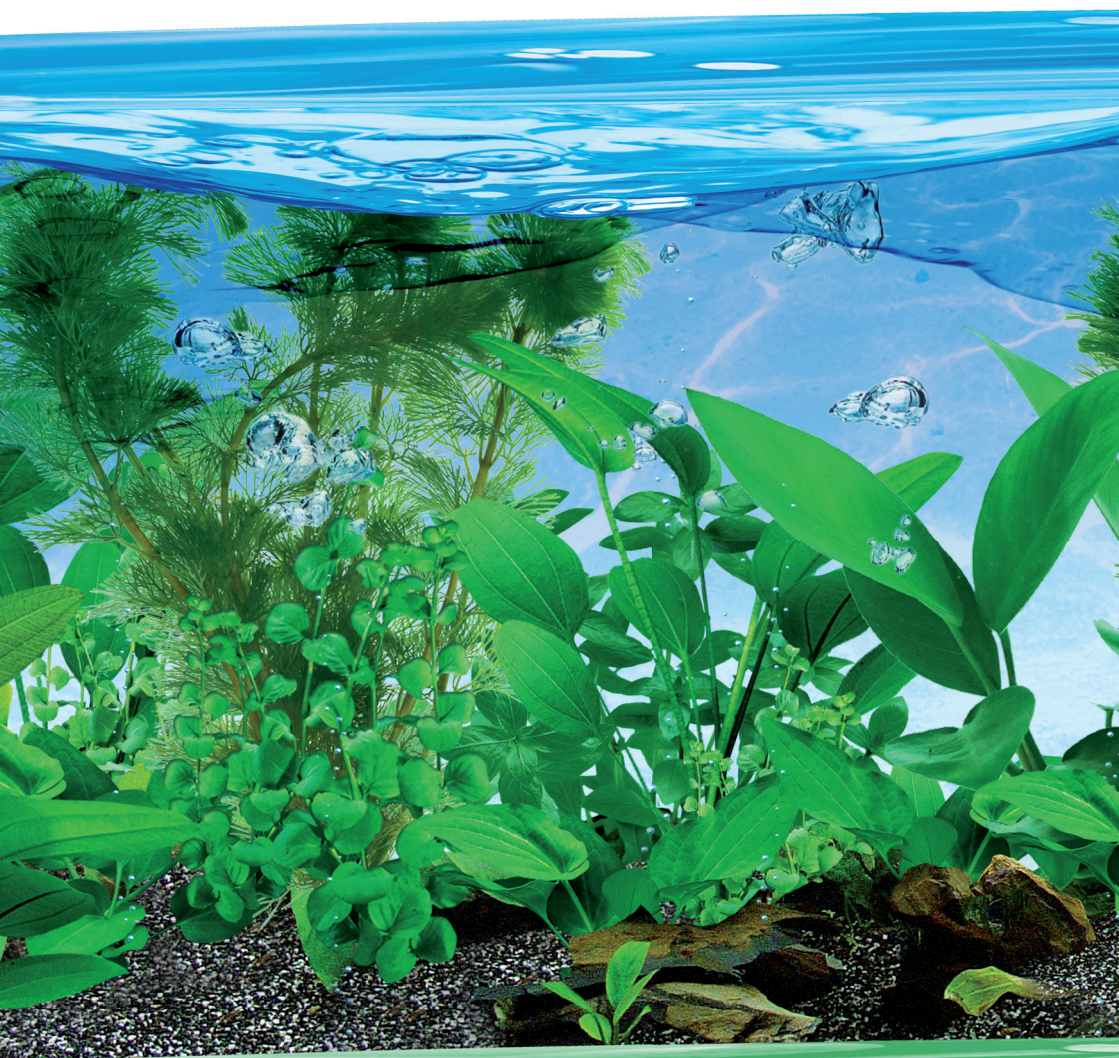

Nutritional liquid supplement formulated for AROWANA and contains iodine, Pantothenic acid, magnesium and a complete vitamin complex of B - B1, B2, B6 in a single concentrate solution.

CODE	SIZE	UM	CARTON	
AR0500	500 ml	PCS	6	8018189800313

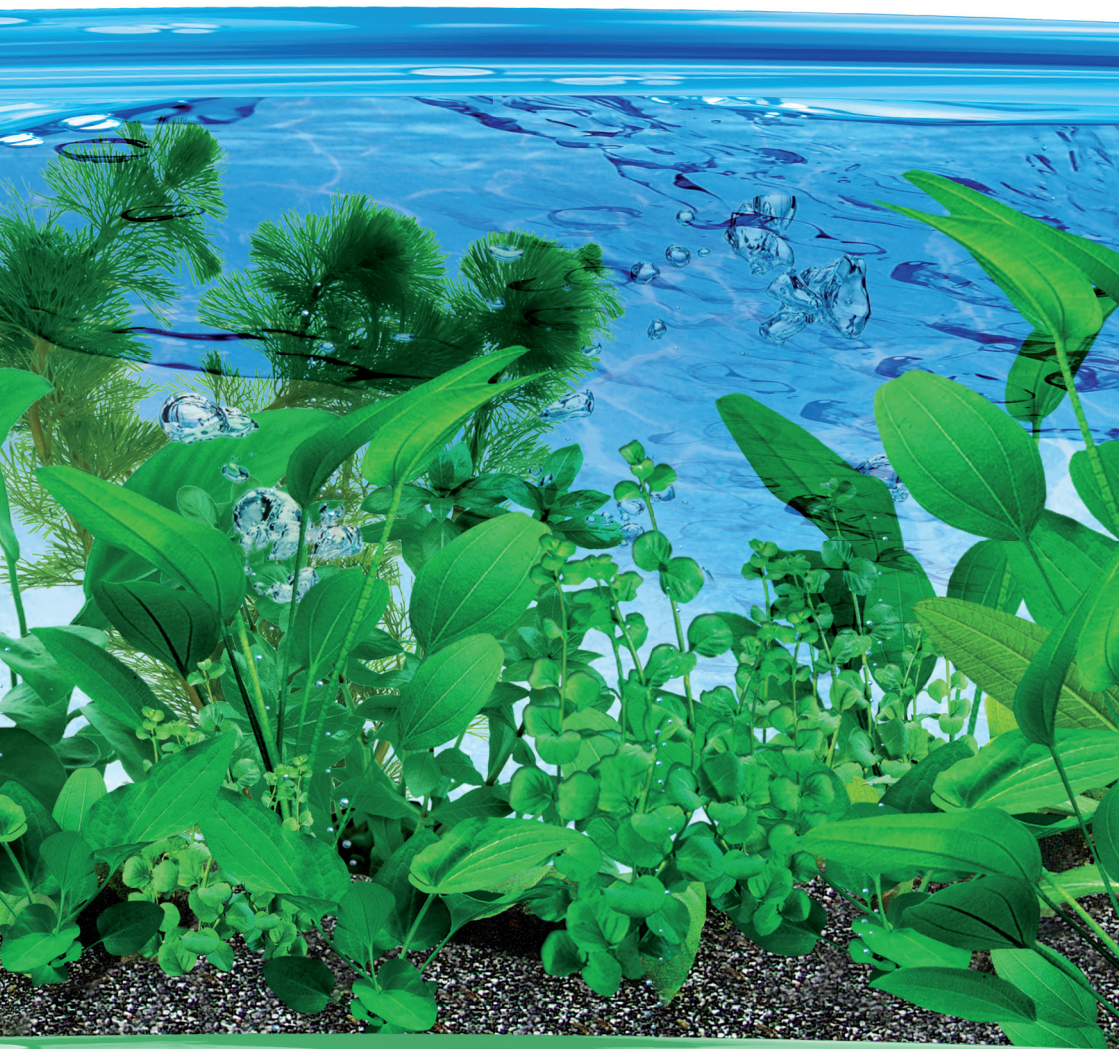

Aquarium water poor in iodine provokes thyroid problems, magnesium deficiency causes stunted growth, that is why all the ingredients in this supplement are indispensable and essential for strengthening and reinforcing the AROWANA's bone structure, for stimulating appetite and for increasing vitality and promoting the fish's natural colour.

As AROWANA ELIXIR is a liquid it is easily absorbed by the fish and constant use ensures healthy and rapid growth. AROWANA ELIXIR promotes microorganisms in biological filtration systems.

- **Use:** every four weeks pour 20 ml for every 100 litres of water directly into the aquarium. Store in a cool, dry place away from sunlight and keep out of reach of children.

FERTILIZER

HUMUS

Fertilizing substrate for aquatic plants.

EXCELLENCE
MADE in Italy

**100%
NATURAL
PRODUCT**

Fertilizing bottom soil ideal for aquatic plants consisting of several types of peat, special fertile soils and nutritional substances indispensable for promoting the growth of these plants.

CODE	WEIGHT	UM	CARTON	
HUMUS	500 gr	PCS	12	8018189300042

• **Use:** cover the bottom of the aquarium with a 1.5 cm deep layer of HUMUS, avoid packing it down and then cover with a 6-7 cm deep layer of gravel. This product maintains its efficiency for a long period of time (approximately 2 years) and should be replaced at each new aquarium set up.

By mixing HUMUS with PRODAC's HUMUPLUS you obtain a highly effective soil ideal for promoting the growth of all types of aquatic plants.

Warning: before filling the tank with water, it is recommended to cover the gravel with a nylon sheet to avoid that the jets of water move the soil below. It is possible that the water initially will turn a pale amber colour, this is due to the humic acid content of the HUMUS peat.

HUMUPLUS

Bottom soil ideal for aquatic plants consisting of several types of peat indispensable for promoting the growth of these plants and more specifically for delicate and fragile ones.

EXCELLENCE
MADE in Italy

**100%
NATURAL
PRODUCT**

A unique product ideal for all types of Cryptocoryne, Heteranthera zosterifolia (star grass), Aponogeton madagascariensis (Madagascar lace-leaf), Aponogeton ulvaceus, Echinodorus tenellus (Pygmy chain sword). HUMUPLUS helps to lower the pH value and Redox potential of the water allowing greater activity of the fertilizing properties which are then easily assimilated by the plants.

CODE	WEIGHT	UM	CARTON	
HPLUS	500 gr	PCS	12	8018189300035

• **Use:** cover the bottom of the aquarium with a 1.5 cm deep layer of HUMUPLUS, avoid packing it down and then cover with a 6-7 cm deep layer of gravel. This product maintains its efficiency for a long period of time (approximately 2 years) and should be replaced at each new aquarium set up. By mixing HUMUPLUS with PRODAC's HUMUS you obtain a highly effective blend of soils ideal for promoting the growth of all types of aquatic plants.

Warning: before filling the tank with water, it is recommended to cover the gravel with a nylon sheet to avoid that the jets of water move the soil below. It is possible that the water initially will turn a pale amber colour, this is due to the humic acid content of the HUMUPLUS peat.

FONDOVIVO

FONDOVIVO is a natural substrate material, especially studied for promoting the luxury development and growth of aquatic plants.

EXCELLENCE
MADE in Italy

**ENRICHED
 WITH IRON**

of: one pack FONDOVIVO, one pack HUMUS, one pack HUMUPLUS. The above indication is valid for a surface area of 80 x 30 cm. Cover the mixture with a 5-7 cm layer of washed gravel, fill the tank with water paying attention to avoid the bottom material rising up to the surface.

CODE	WEIGHT	UM	CARTON	
FVIVO1.8	1500 gr	PCS	12	8018189300011
FVIVO3	2500 gr	PCS	10	8018189300134
FVIVO10LT	8000 gr	PCS	1	8018189300028

It is made of clay, trace elements and it is enriched with ferrous mineral under sulphate form. Its particular porous structure helps easy rooting of plants and the oxygenation of the ground.

• **Use:** open the packaging, do not wash the product to avoid eliminating the active substances, cover the bottom of the tank with a 2-3 cm layer.

Note: in order to have the best and rich bottom material for the growth of your plants we recommend laying a mixture

FERTIL PEAT PLATES

Peat is a natural material which provides a rich substrate for the growth of the aquatic plants while keeping the aquarium water soft.

EXCELLENCE
MADE in Italy

CODE		UM	CARTON	
TAVTOR	3	PCS	12	8018189300127

• **Use:** cover the entire aquarium bottom with peat plates, or cover only the site where plants will be placed.

Cover the plates with 7 to 8 cm of aquarium gravel or substratum, e.g. FERTILPLANT from PRODAC.

Put the plants into the tank until they reach the peat plates so that they may easily root.

**100%
 NATURAL
 PRODUCT**

We recommend: immerse the peat plates in water for 24 hours before using them in the aquarium.

FERTIL PLANT

Is a natural soft, porous and gravel (2-6 mm) bottom soil consisting of clay, zeolite and soils rich in trace elements ideal for planted freshwater aquariums.

EXCELLENCE
MADE in Italy

**100%
NATURAL
PRODUCT**

CODE	WEIGHT	UM	CARTON	
FERTIL 1.8	1800 gr	PCS	1	8018189300165
FERTIL	3200 gr	PCS	1	8018189300141

FERTIL PLANT is a natural and nutritional product absorbed through the plant roots ideal for promoting a lush and healthy growth. It also increases oxygenation at the bottom of the aquarium and does not cloud the water.

• **Use:** do not wash the product to avoid eliminating the active substances. Cover the bottom of the tank with a 1 cm layer and then cover with a 6-7 cm layer of gravel.

Before filling the aquarium with water we recommend you cover the gravel with a nylon sheet to avoid moving the bottom soil when filling.

- A 3,2 Kg bag is sufficient for a 100 x 40 cm aquarium.
- A 1.8 Kg bag is sufficient for a 80 x 30 cm aquarium.

CO₂ PLANT

Carbon dioxide is an essential element for plants and in particular for their structure. These effervescent CO₂ PLANT tablets not only release carbon dioxide in the water, but other nutritional substances for stimulating a lush plant growth, an important advantage over the use of CO₂ bottles which only release carbon dioxide.

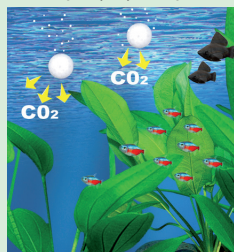

EXCELLENCE
MADE in Italy

CODE		UM	CARTON	
CO ₂	20	PCS	6	8018189300158

These CO₂ PLANT tablets are quick dissolving (approx. 10-15 sec.) and do not leave traces of excipients as the fertilizing substances contained in the tablets act as the reaction medium and are absorbed rapidly by the plants.

• **Use:** one tablet for every 50 lt of water, once a week. Simply drop the tablet in the middle of the aquarium. If more tablets are required, drop them in different points in the aquarium allowing a uniform release of carbon dioxide in the water. Up to a 40% over dosage is tolerated and does not harm the fish.

NUTRONFERRO

Fertilizer enriched with iron for promoting a lush and healthy growth of aquatic plants.

EXCELLENCE
MADE in Italy

**ENRICHED WITH
 FERROUS MINERAL
 AND TRACE ELEMENTS**

Some plants particularly weak often have yellowing, fragile and transparent foliage because of lack of nutrients. The regular use of NUTRONFERRO prevents aquatic flora from weakening.

CODE	SIZE	UM	CARTON	
NFER100.01	100 ml	PCS	12	8018189800269
NFER250.01	250 ml	PCS	12	8018189800276
NFER500	500 ml	PCS	6	8018189800559
NFERRO5000	5000 ml	PCS	1	8018189300073

• **Use:** shake the bottle before use, once a week pour 10 ml for every 40 litres of water into the aquarium. No danger of overdose.
Warning: this product may give the water an opaque appearance, this effect disappears after approximately 6-8 hours and the water becomes crystal clear. This does not in any way affect the biological balance in the aquarium. To stimulate a luxuriant plant growth it is recommended to alternate PRODAC's NUTRONFERRO with NUTRONFLORA which is a trace element supplement. It is not a PPP (plant protection product).

NUTRONFLORA

Fertilizer enriched with trace elements for promoting a lush and healthy growth of aquatic plants.

EXCELLENCE
MADE in Italy

**ENRICHED WITH
 TRACE ELEMENTS**

The regular use of NUTRONFLORA prevents aquatic flora from weakening and strengthens the fragile plants because it supplies all the nutrients necessary to their growth.

CODE	SIZE	UM	CARTON	
NFLO100.01	100 ml	PCS	12	8018189800283

NFLO500	500 ml	PCS	6	8018189800306
NFLORA5000	5000 ml	PCS	1	8018189300110

• **Use:** shake the bottle before use, once a week pour 10 ml for every 40 litres of water into the aquarium. For greater growth development we recommend that you alternate this product with PRODAC's NUTRONFERRO which contains more iron, or PRODAC's BIOTRIX BLACKWATER which contains minerals salts, humic acids and trace elements.

It is not a plant protection product.

SEA SALT

OCEAN FISH

Quick dissolving marine salts for ornamental aquariums with a grade of purity of almost 100%.

These salts contain all the necessary trace elements for ensuring a correct fish and invertebrates growth. These trace elements remain unaltered when the salts dissolve.

CODE	WEIGHT	UM	CARTON	
OC30	1 Kg	PCS	12	8018189500015
OC60	2 Kg	PCS	12	8018189500022
OC120	4 Kg	PCS	6	8018189500039
OC240	8 Kg	PCS	1	8018189500183
OC20KG	20 Kg	PCS	1	8018189500046
OC20KGS	20 Kg	PCS	1	8018189500206
OC30KG	30 Kg	PCS	1	8018189500145

• **Use:** dissolve the required quantity of salt in fresh water at a temperature of 24°C. The ratio is 33 gr per 1 litre of water, mix well and

if possible utilize osmotic water. This solution can be prepared either in non-toxic plastic containers or directly in the aquarium. If utilizing directly in the aquarium, we recommend that you start up the centrifugal pump to obtain an optimum mix. It is recommended to always control the density of salt water, if it is lower than 1025 add OCEAN FISH until obtaining the required level, if the density is over 1025 add fresh water. This salt solution can be used immediately, however it is recommended to wait 12 hours before putting the fish in the aquarium. For maintaining a correct marine environment in the aquarium, it is necessary to change 25% of the water monthly and adding at each water change the indispensable trace elements for a correct biological balance (e.g. PRODAC'S MAGIC TRACE ELEMENTS).

OCEAN LOBSTER

A marine salt perfect for breeding and stocking crayfish, lobster and any kind of crustacean in seafood restaurant and in fishmonger's shop.

OCEAN LOBSTER salt has 8.1 pH value, it is totally fast soluble and keeps water crystal clear. It contains all the necessary trace elements for keeping crustaceans not only alive but also very safe because it re-creates the biological balance of the sea water in tank.

CODE	WEIGHT	UM	CARTON	
AR20KG	20 Kg	PCS	1	8018189500176

• **Use:** dissolve 33 - 35 gr/l salt in osmotic water if possible. Tap water does not jeopardize the efficiency of the salt provided that water is kept still for 12 - 24 hours before use, to allow oxygenation and chlorine evaporation. It is recommended to always control the ideal water temperature 6°C - 8°C and the density of salt water, which must be 1024-1025 for crayfish and 1028 for lobster.

For maintaining a correct biological balance in the tank it is recommended to change 25% of the water each two months or more frequently if the stocked quantity of crustacean is high.

OCEAN REEF

Quick dissolving marine salts specific for reef aquariums with a grade of purity just under 100%.

These salts contain all the necessary trace elements for ensuring a correct fish and invertebrates growth and are further fortified with calcium and vitamins for stimulating growth and strengthening invertebrates with rigid skeleton. All of these substances remain unaltered when the salts dissolve.

MAGIC TRACE ELEMENTS

A solution containing trace elements which are essential for reef aquariums and for all saltwater aquariums with invertebrates.

CODE	SIZE	UM	CARTON	
MTR	250 ml	PCS	12	8018189200076

This product is a booster concentrate containing potassium, fluorine, strontium, calcium, magnesium, sodium and all other vital elements for ensuring and promoting growth of saltwater organisms above all when changing environment.

- **Dosage:** shake the bottle before use, pour 10 ml (= 1 cap full) for every 100 litres of water directly into the aquarium. Treatment on average is once a week. It is highly recommended to keep the product out of reach of children.

MAGIC IRON + MANGANESE

A solution containing iron and manganese which are essential for saltwater plants and in particular for all varieties of Caulerpa and for aquariums with dense coral growth.

CODE	SIZE	UM	CARTON	
MFE	250 ml	PCS	12	8018189500091

This product is a booster concentrate which promotes colouring of many organisms and is vital for their metabolism also including filtering bacteria.

- **Dosage:** shake the bottle before use, pour 10 ml (= 1 cap full) for every 100 litres of water directly into the aquarium. Treatment on average is once a week. Increase treatment (every 4-5 days) if there are numerous invertebrates and saltwater plants in the aquarium. It is highly recommended to keep the product out of reach of children.

MAGIC KH PLUS

Mixture rich of mineral salts which increases the temporary hardness of fresh water (suggested KH about 4°) and marine water (suggested KH about 8°/10°).

CODE	SIZE	UM	CARTON	
MKH	250 ml	PCS	12	8018189500169

- **Dosage:** control the KH level of the water and if it results to be lower than the values given: shake the bottle before use, 10 ml (= 1 cap full) for every 100 lt of water directly into the aquarium. After about 30 minutes recontrol the KH value. If the KH level has not increased to the required value, add a further dosage of 10 ml for every 100 lt and recontrol the KH after 30 minutes. Repeat this procedure until obtaining the required KH level.

Warning: it is of utmost importance to gradually and slowly return the KH level to its correct value. It is recommended to store this product in a cool, dry place away from sunlight and to keep out of reach of children.

MAGIC STRONTIUM + MOLYBDENUM

A solution containing strontium and molybdenum which are essential for reef aquariums and for all saltwater aquariums with invertebrates.

CODE	SIZE	UM	CARTON	
MST	250 ml	PCS	12	8018189500121

Strontium promotes growth in organisms with calcium based skeletons by boosting their calcium assimilation, molybdenum is a vital element of some enzymes produced by invertebrates, filtering bacteria and saltwater algae.

- **Dosage:** shake the bottle before use, pour 10 ml (= 1 cap full) for every 100 litres of water directly into the aquarium. Treatment on average is once a week. Increase treatment (every 4-5 days) if there is dense growth and numerous organisms in the aquarium. It is highly recommended to keep the product out of reach of children.

MAGIC IODINE + MAGNESIUM

A solution containing iodine and magnesium which are essential for saltwater reef aquariums and for all saltwater aquariums with invertebrates.

CODE	SIZE	UM	CARTON	
MIO	250 ml	PCS	12	8018189500107

This product is a booster concentrate and the ideal trace element supplement to ensure a healthy growth of saltwater organisms.

- **Dosage:** shake the bottle before use, pour 10 ml (= 1 cap full) for every 100 litres of water directly into the aquarium. Treatment on average is once a week. Increase treatment (every 4-5 days) if there are numerous organisms in the aquarium. It is highly recommended to keep the product out of reach of children.

MAGIC CALCIUM PLUS

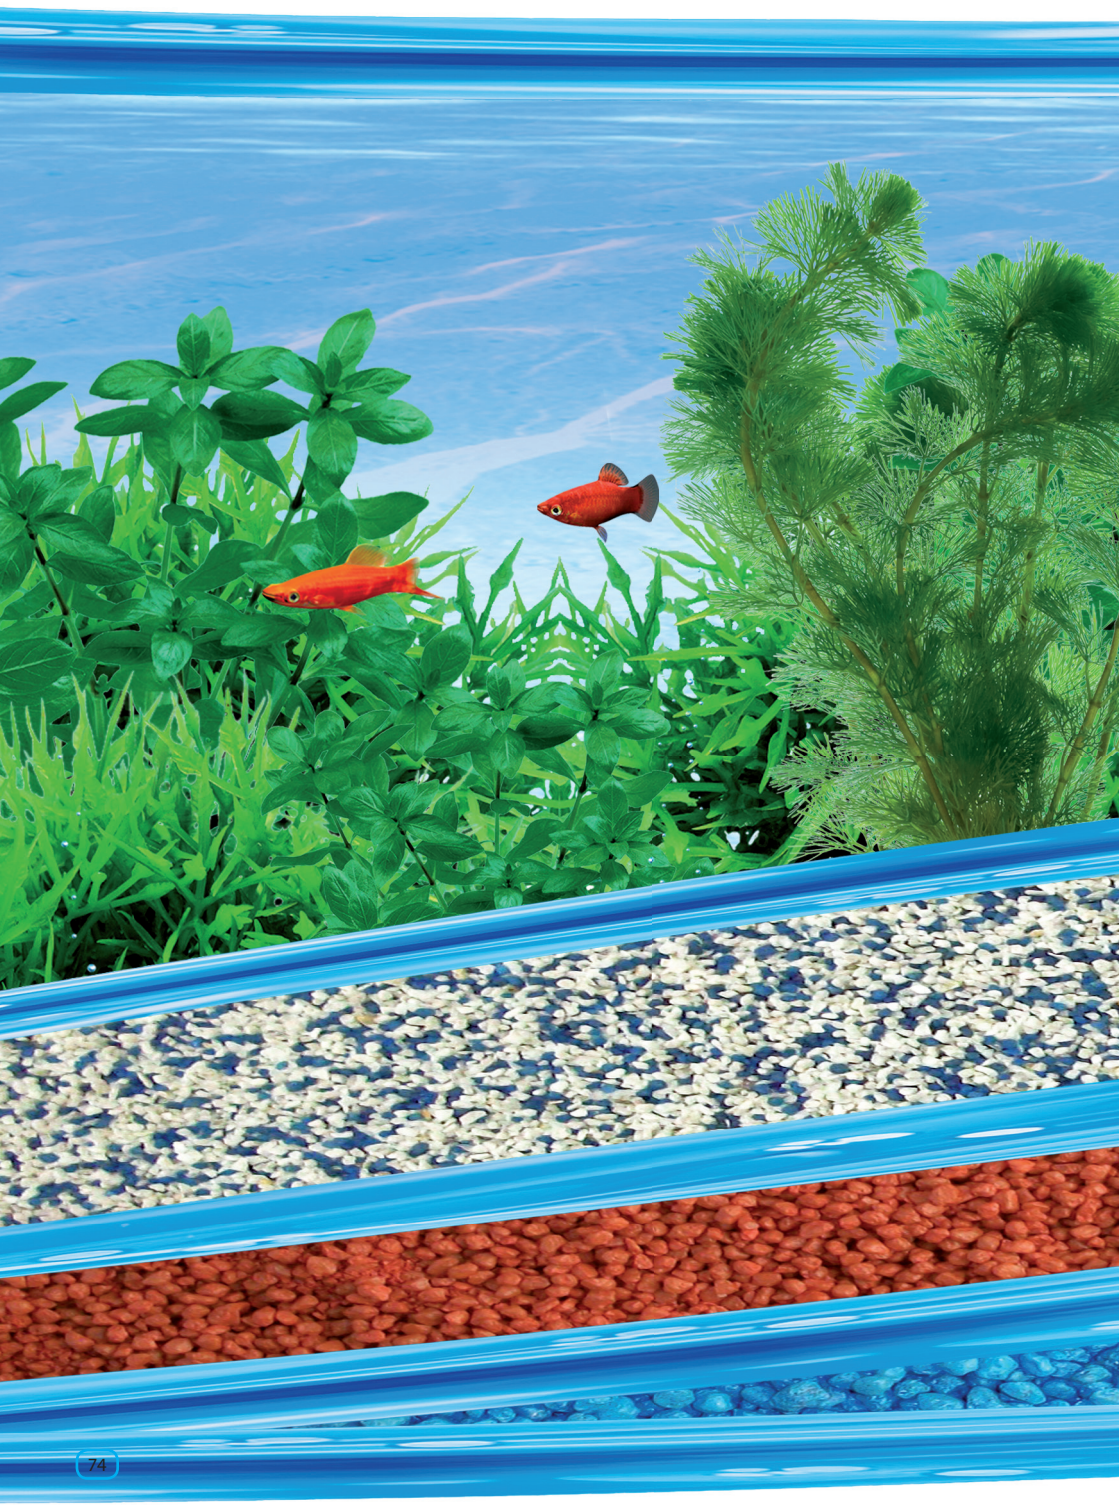

A solution containing calcium and trace elements which are essential for reef aquariums and for all saltwater aquariums with invertebrates.

CODE	SIZE	UM	CARTON	
MCA	250 ml	PCS	12	8018189500114

It is a booster concentrate containing Calcium, Magnesium and Manganese all vital elements for ensuring and stimulating growth and ideal for strengthening invertebrates with rigid skeletons such as Tridacna and Goniopora.

- **Dosage:** shake the bottle before use, pour 10 ml (= 1 cap full) for every 100 litres of water directly into the aquarium. Treatment on average is once a week. Increase treatment (every 4-5 days) if there are numerous invertebrates in the aquarium. It is highly recommended to keep the product out of reach of children.

AQUASANA POND

Is an indispensable water conditioner which not only eliminates chlorine and chloramines in tap water, but also reduces the polluting effects caused by heavy metals in the water, conditioning and preparing the pond water for pond life and fish.

EXCELLENCE
MADE in Italy
Autentico gusto italiano

CODE	SIZE	UM	CARTON	
PASAN500	500 ml	PCS	6	8018189130236

It contains ALOE VERA a special and natural colloid which protects the skin slime and gills of fish reducing stress when changing water maintaining the pH level stable.

- **Dosage:** 100 ml per 2000 litres of water every 15 days.
- Warning:** when utilizing AQUASANA POND remove active carbon filters from the filtering system. It is highly recommended to keep the product out of reach of children.

**NEUTRALISES CHLORINE
AND CHLORAMINES**

ALGACONTROL POND

Is a water treatment which controls, prevents and eliminates the growth, stimulated by sunlight, of floating algae in ponds. In fact floating algae is harmful to fish and aquatic plants.

EXCELLENCE
MADE in Italy
Autentico gusto italiano

CODE	SIZE	UM	CARTON	
PAG500	500 ml	PCS	6	8018189130243
ALGACO5LT	5000 ml	PCS	1	8018189130045

ALGACONTROL POND makes pond water crystal clear and maintains the pond in perfect conditions ensuring the safe growth and reproduction of fish and plants.

- **Dosage:** 100 ml per 2000 litres every 15 days. Dilute the required dosage in approximately 2 litres of water and evenly distribute the solution in the pond water; under normal conditions, good results are obtained after 24 to 36 hours. In the event of exceptional algae growth it is recommended to repeat treatment every 12 days.

Warning: in the event you should notice anomalous behaviour of the fish or the fish are visibly suffering immediately change 1/3 of the water.

It is highly recommended to keep the product out of reach of children.

**MAKE CRYSTAL
WATER**

ZEOLITH POND

Various minerals exist in Nature called zeolites. After extensive laboratory research, PRODAC have chosen ZEOLITH because of its high absorption power and its porosity, which gave the best results in helping the efficacious establishment of bacteria of the Nitrosomonas group.

EXCELLENCE
MADE in Italy
Autentico gusto italiano

CODE	WEIGHT	UM	CARTON	
PZE05	5 kg	PCS	1	8018189130298

• **Use:** using a sufficient layer of ZEOLITH in the pond filters has lead to the efficient absorption of nitrites, nitrate and ammonia, thus improving the biological balance of the pond. 5 Kg pack sufficient to filter a pond of 7000 litres. We recommend changing it every 3 months.

ADSORBS POLLUTING, ORGANIC AND INORGANIC SUBSTANCES.

CARBO-ZEO POND

Filter media specially formulated to absorb polluting particles in garden ponds and it can be used in any filter. Activated carbon absorbs the polluting pigments produced by the decomposition of many substances in pond, such as food waste, dead algae and plants.

EXCELLENCE
MADE in Italy
Autentico gusto italiano

CODE	WEIGHT	UM	CARTON	
PCAR0	5 Kg	PCS	1	8018189130281

Zeolite absorbs and neutralizes nitrites, nitrates, silicates and ammonia, keeping the aquarium water crystal clear.
• **Use:** bucket of 3 kg sufficient for 7000 litres pond. The product must be replaced every 90 days.
